## THE ACTIV-2 STUDY

# WE CAN RISE ABOVE COVID-19, BUT WE CAN'T DO IT WITHOUT YOU

Dear partners and friends,

We need your help. We are working on a COVID-19 treatment study, called ACTIV-2, that aims to find a treatment for COVID-19. We are reaching out to see if you can help in this global effort.

#### WHAT IS THE STUDY?

The ACTIV-2 Study is testing different medicines to see if they are safe and can help people with COVID-19. Finding treatments for COVID-19 is important because the virus is spreading quickly and can cause serious sickness and even death. Right now, there are no proven treatments for people who are sick with COVID-19, but not sick enough to be in the hospital.

The study lasts about 6 months and involves in-person visits, as well as phone calls or video chats.

### WHO CAN JOIN THE STUDY?

The study is open to people 18 years and older across the U.S. who:

- Tested positive for COVID-19 (no more than 7 days ago)
- Are at home (not in the hospital)
- Have COVID-19 symptoms

Because Black, Indigenous, Hispanic, and other communities of color are disproportionately acquiring, being hospitalized with, and dying from COVID-19, ACTIV-2 is especially focused on enrolling individuals from these communities.

#### WHAT YOU CAN DO TO HELP?

Clinical trials are vital to discovering medical treatments and they only work when enough people volunteer. Here's what you can do:

- Visit RiseAboveCOVID.org: Learn more about the study and how you can get involved.
- Raise Awareness: Spread the word about the ACTIV-2 Study to colleagues, friends, and members of your community.
- Refer Potential Participants: If you know anyone who was recently diagnosed with COVID-19, have them call the study contact center at (877)-345-8813 to see if the ACTIV-2 Study is right for them.
- Reach out: If you want to find out other ways you can get involved, please reach out to me.

Together, we can find a solution. We thank you for joining the fight to rise above COVID.

Visit RiseAboveCOVID.org to learn more about the study.
